Assignment One

Dowayne Davis, Meredith Moore and James Murduca

New Jersey City University

1. Mission and Vision

The mission of the Wake County Public School System (WCPSS) is to create an environment where students and teachers will feel supported with 21st Century tools, training, and leadership. WCPSS has the confidence that the integration of a technology module will strengthen and diversify the delivery of instruction in meeting curriculum requirements. The acquisition of the indispensable skills in technology promotes lifelong learning and abilities that are transferrable to college and career readiness. WCPSS is dedicated to delivering the technological practices and concepts that are necessary for meeting the challenges of a technologically progressive society.

The vision for the three schools is to create learning environments at school and home that are enriched with 21st century technology. These environments will promote collaboration and communication among administrators, teachers, students and parents enabling students to reach their maximum potential socially and academically. The implementation of this technology plan will enable all constituents to (WCPSS, Technology Plan, 2016):

- a) Augment pedagogy to meet the needs and learning modalities of the students.
- b) Engage in synchronous and asynchronous learning in multiple environments.
- c) Use 21st century problem solving skills.
- d) Encourage creativity and powerful ideas (Bers, 2015).
- e) Attain various means of expression in student learning and creativity.
- f) Attain international access to educators and learners around the globe.
- g) Continue to use state of the art software and technology as it emerges.
- h) Understand and remain cognizant of college and career readiness skills.

2. General Introduction/Background

Technology is an integral part of our everyday living experiences. The proliferation of the various types of technology serving the human race are found everywhere such as the workplace, shopping, travel and commuting, and many other essential facets that influence our daily lifestyle.

The use of technology has become second nature to our young generation and their fearless use and

adaptation affects many forms of socialization, searching for information, and entertainment. With technology being embraced in our natural environment, transitioning this tool into the educational environment will serve as a mechanism to enhance and differentiate instruction of the curriculum. The teaching staff is highly qualified for this technology initiative having 46.9% of the staff earning advanced degrees in Masters and Doctorate programs (WCPSS, District Facts, 2016). Wake County Public School System is experiencing a substantial growth in population and will need to provide educational services to an additional 1,700 students (WCPSS, District Facts, 2016). This number correlates the construction of three new schools. The three new schools will be The James Murduca Early Elementary School K-6, Dowayne Davis Early Elementary School K-6, and Meredith Moore Middle School 7-8. The two elementary schools will serve 500 students in kindergarten through sixth grade while the middle school will serve 700 students in grade seven through eighth. Ethnicities among each school are similar in proportion. The breakdown of the ethnicity is less than 1% American Indian, 3% Asian, 28% African American, 15% Hispanic, 5% Other, and 49% White for the entire district. Less than 30% of our students receive free or reduced priced meals which translates to the majority of the funding coming from local sources and less from state sources. It is forecasted that WCPSS will served a relatively small number of students with disabilities that require accommodations which will require limited number of technology with assistive capabilities. The table (Table 1) below shows the demographic breakdown of each school (WCPSS, District Facts, 2016).

Table 1 Demographic Breakdown Chart

Schools/Ethnicity	Elementary 1	Elementary 2	Middle 1	WCPSS
American Indian	1	0	1	0.12%
Asian	15	16	20	3%

African American	143	140	195	28%
Hispanic	74	76	105	15%
Other	25	20	36	5%
White	242	248	343	49%
Total	500	500	700	100%

The three schools will employ a staff count of 183. One hundred and thirteen employees will be teachers, and the remaining seventy employees will be a mix of administrative, support staff, and operations staff. According to the District Facts found on the Wake County Public School System site, 46.9% of all teachers hold advance degrees; additionally, 15% of all teachers hold a National Board Certification. Table 2 below summarizes the forecasted faculty for the additional three schools in WCPSS.

Table 2 WCPSS Staff Breakdown for the Three Additional Schools

Total Number of Employees	183
Total Number of Teachers	113
Teachers with Advanced Degrees	62 (46.9%)
National Board Certified Teachers	17 (15%)

Note: Percentage are drawn from the Wake County School database

3. Needs Assessment/Goals

WCPSS Technology Use Evaluation and Remaining Needs

To effectively design this strategic technology plan, it is important to evaluate and understand the current state of WCPSS's schools with the aim to achieve an academic environment of the 21st century. An evaluation of the current state will lay the foundation for the remaining needs WCPSS should account for and prioritize to reach each intend goal. Figure 1

evaluates nine key areas of focus and describes the needs and their priority within the scope of this strategic plan. All areas are critical components to reach the goals of this strategic plan. Figure 2 and 3 lists the goals and objectives of the technology plan and their alignment to the needs assessment.

Figure 1 Needs Assessment

Area	Evaluation	Remaining Needs	Priority
Network Capacity	Given that WCPSS will	With focus on 21 st century	High

	utilize cloud technology to	traditional onsite servers.	

	manage instruction and lesson delivery.	However, systems such as firewalls, caching servers, tablets, laptops, and other in-house devices will require backup devices and software.	
Technology to Support Students (A-6)	Similar to other schools in Wake County, students that will attend WCPSS are eager to learn more about computer applications. Given the affluent background of the students at WCPSS, access and exposure to technology are high.	WCPSS will need to provide a robust curriculum and modern devices to students to improve students understanding and use of technology both in and outside of the school environment. A 1:1 Chromebook setting with anytime-anywhere access is a high priority.	High
Technology to Support Faculty (A-7)	Teachers at WCPSS are all certified. More than 50% of the teachers hold advanced certification and degrees.	Implementation of cloud services can improve access to data, professional development content and increase educators' productivity. Additionally, building connection with nearby colleges and universities will allow future professional develop for teachers with the ability to turn-key new information to others teachers	Medium
Technology for Curriculum (A-8)	The curriculum will follow the Information and Technology Common Core.	When the 1:1 Chromebooks and BYOD initiative are implemented, the federal #GoOpen initiative will also be implemented. Open educational resources can increase equality and content will be relevant.	High
Assistive Technology (A-9)	Due the WCPSS's relatively small size there is a small population of students with disabilities that require assistive devices outside of standard	The number of students with disabilities may increase with higher student enrollment. Additional headphones and computers will be needed with	Low

magnification and audio features available on the	Assistive Technology features to help these	
tablets and laptops.	students succeed.	

Figure 2 WCPSS Technology Goals Aligned to Needs Assessment

Goals	Needs Assessment	Description of goal
1	A-6, 7, 9	Provide innovative, reliable, and scalable technology devices and systems that ensure attainment of educational objectives
2	A-1, 2, 3	Ensure a robust, safe, and accessible network that supports operational and academic use of technology
3	A-8	Develop an environment that encourage student-centered learning, where students take responsibility for independent and collaborative acquisition of information and learning complex concepts while developing skills to become lifelong learners.
4	A-7	Provide training, workshops, classes, etc. throughout the school-year for faculty and staff to continue higher education opportunities through partnerships with the ten Wake County higher education universities.
5	A-2, 4, 5	Provide ongoing support to all end-users and management of all devices, in the pursuit of maintaining a systematic and successful implementation of the technology, while ensuring reliability. (Frazier, 2012, p 57)

Figure 3 WCPSS Objectives for All 3 Schools Aligned to Goals

Objective	School	Description of objectives	Completion Date
1	All 3 Schools	Design and complete networks in all three buildings	By Opening
2	All 3 Schools	Approve working network use and technology policies for staff and students by the WCPSS Board of Education	Year 1

3	Middle School	Implement bring your own device initiative at the middle school to enrich student learning.	Year 1
4	All 3 Schools	Wireless connectivity will be available in all offices and classrooms	Year 1
5	All 3 Schools	Provide all teachers with at least five hours of preservice technology professional development to ensure understanding and use of teacher and student devices. ie: teacher computers	Year 1
6	All 3 Schools	Purchase and install one digital board in each elementary classroom and two televisions in each middle school classroom	Year 1-2
7	Middle School	Implement the federal #GoOpen to provide high-quality learning materials to all middle school students	Year 2
8	Both Elementary Schools	Provide 1:1 Chromebooks or iPads to all students, faculty and administrators to foster collaboration, real world 21 st century project based learning, and anytime anywhere access	Year 2-3
9	Middle School	Provide emerging technologies to enhance students	Year 2-3
10	All 3 Schools	Provide administrators and teachers with professional development training (Frazier, 2012, p 52) and the support needed to maintain a continuous and successful integration of technology in the schools.	Year 3

4. Inventory: WCPSS Technology Inventory and 3-Year Needs

Given that WCPSS will open with three new schools, technology inventory does not currently exist. Table 3 summaries the category of devices, services, and software WCPSS will require to operate and achieve its educational objectives over the next three years, as part of this strategic technology plan. The table summarizes the needs for each school and provides a total column for the district. The technology inventory is comprised of four major categories that

include, classroom devices and software, office devices and software, network devices, and eRate services and equipment. The forecasted inventory is calculated based on technology objectives, student enrollment, number of teachers, number of staff, and number of rooms. The WCPSS inventory plays an important role in funding and technology acquisition over the term of this strategic plan.

Table 3 WCPSS Inventory Plan

5. Technology Acquisition Plan

Technology acquisition is a critical component to successful executing WCPSS's strategic technology plan. Given that the three schools will be new opened during the first year of this plan with new implementations, systems, and networking, a tiered approach to technology acquisition will be used to prioritize projects and manage the technology budget. The Table 4 timeline for technology acquisition is detailed for all four major technology areas and item lines.

Over the course of this three-year plan, various items will be procured, installed, implemented, and/or carried out in whole or part. The acquisition and implementation of each item lines are notated by a percentage for each year. The major priorities for year one will be networking devices, eRate services and equipment, staff machine, and student's machine. These items are listed at 100% for year one because they are critical to a functioning school at the start of the school-year. All other technologies are acquired in part over the course of the three-years to ensure feasible acquisition and meet educational needs. For example, student Chromebooks will be gradual purchase with a gradual integration over three-year for all three schools.

Table 4
Technology Acquisition

Class Devices & Software	Total	% Acquired Year 1	% Acquired Year 2	% Acquired Year 3	Estimate 3-Year \$\$
Desktops	60	50.00%	50.00%	0.00%	\$30,000.00

E-Rate Consultant	1	33.33%	33.33%	33.33%	\$9,000.00
Sub Total					\$251,862.50

6. Funding Plan

To fully execute WCPSS's strategic technology plan, an estimated totally budget of \$1,265,631.81 will be needed. It is anticipated that this plan will be funded through revenue received from Federal, State, Local, and Grants sources. Given WCPSS's low proportion of economically disadvantaged students, as noted by the district's low percentage of students that received free or reduced priced, lunch, local funding from taxpayers will serve as a dominant revenue source. As shown in Figure 4 and Table 5 below, WCPSS is forecasted to spend \$760,165.00 in year one, \$303,342.43 in year two, and \$203,155.56 in year three.

Figure 4 WCPSS 3-Year Spending Plan

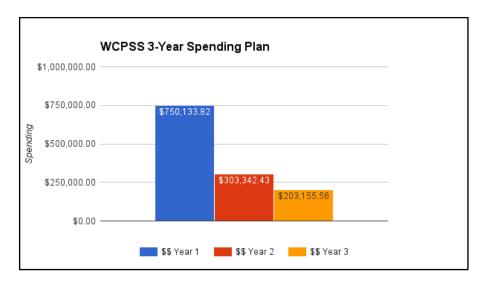

Table 5 WCPSS Anticipated Funding Table 2017-2019

Total Funding Plan	Year 1	Year 2	Year 3	3-Year Total
Federal Funding	\$37,506.69	\$15,167.12	\$10,157.78	\$62,831.59
State Funding	\$112,520.07	\$45,501.36	\$30,473.33	\$188,494.77
Local Funding	\$525,093.67	\$212,339.70	\$142,208.89	\$879,642.26

Yearly Total	\$750,133.82	\$303,342.43	\$203,155.56	\$1,256,631.81
Grants Funding	\$75,013.38	\$30,334.24	\$20,315.56	\$125,663.18

Note: see Appendix I for a breakdown of each year

7. Access

The purpose of providing this communication technology is to support the district's commitment for access to global information for all staff and students. The Board of Trustees of WCPSS (Board) cannot guarantee the accuracy or appropriateness of materials accessed on the Internet. To protect the district from liability, the Board is not responsible for personal or financial damages suffered through the unauthorized attainment of unregulated information from the Internet.

WCPSS will provide both students and staff with devices to ensure instruction and education. The technology provided by WCPSS is property of the school system. Therefore, WCPSS reserves the right to monitor all activities and devices used within the network. All adult users are responsible for their own accounts and must take all precautions to protect them. All students are required to maintain safe guard of devices and user accounts are described in student network user policies and conduct agreement. To deny a child's access, the parent/guardian must notify the principal in writing.

Students in grades 7-8 will be granted access to individual e-mail accounts and Internet access to WCPSS's network and digital resources. WCPSS reserves the right to limit access to various network resources based on user roles. A network user agreement for both students and staff will be developed and is required to be signed by students, guardians, and staff. At the request of teachers, students in grades 4-6 may have their own filtered and restricted-use e-mail account with the consent of parent/guardians.

District policies and procedures are in place to ensure staff and students have equitable and effective access to telecommunication and technologies through:

- the equitable distribution of resources
- supporting WCPSS students for achievement in college and career readiness
- providing access for best practices
- accommodating students with special needs with assistive technology
- providing access from external resources including libraries, home schooling,
 remote teacher sites, and other services.

Acceptable Use Policy (AUP)

The acceptable use policy (AUP) is the overall governing system for all staff and students including teacher and student misuse. Students and staff need to be aware of the prohibited activities and language and students practice involving personal contact information and meeting individual online. Student misuse is governed by the regulations of policy 5131 Conduct/Discipline. Employee misuse may result in appropriate discipline in accord with the collective bargaining agreement and applicable laws and regulations.

8. User Support Plan

The instructional designer and the instructional technologist will be shared between the two elementary schools and the middle school. Both positions will be housed at the middle school. A help desk will be established in the library at each school. The instructional designer and instructional technologist will provide support to administration, teachers, staff, and students. The designer will handle resetting passwords, developing content, creating assessments, how-to-use Canvas, etc.. The technologist will handle Canvas administration,

emerging technology, multimedia, etc.. The help desk will be opened from Monday through Friday, 8:00 am to 4:00 pm. Administration, teachers, staff and students can access the help desk through the Help Desk phone number, email address or the assigned Help Desk hours at each school. If a hardware ticket is submitted, the instructional designer or instructional technologist will forward the ticket to the information technology department to be handled.

9. Staff Training Plan

The technology professional development plan depicted in Figure 5 is for the two elementary schools and the middle school. Figure 6 summarizes the internal resources WCPSS offers teachers, administration and staff. Figure 7 depicts the external resources available to teachers, administration and staff in Wake County. The goal is to ensure that 183 staff member obtain at least ten hours of technology training each year at an estimate per staff rate of \$10.00 an hour.

Figure 5 Professional Development Plan

10. Program Evaluation

As part of the annual needs assessment and planning process, Wake County Public School System will conduct an annual evaluation of the schools' technology plan. This evaluation will consist of:

- 1. A detailed inventory of equipment, services, and capabilities actually implemented at the school;
- 2. A comparison between actual implementation and the preceding Objectives and Strategies;
- 3. A detailed review of student achievement results and teacher performance evaluations;
- 4. A detailed review of family surveys, student surveys, and staff surveys related to technology;

5. A detailed review of constituent feedback from other forums including quarterly Parent Teacher Organizations (PTO) from each school, community partnerships, etc..

- 6. A review of surveys conducted on other similar schools and their technology programs; and
- 7. A detailed review of projected expenses versus actual expenses

The team responsible for conducting this annual evaluation, gathering the data, and generating a report will consist of the: Chief Information Technology Officer, Technology Coordinator, Instructional Designer, Instructional Technologist, Media Specialist, select teachers, and any relevant external consultants. Based on this evaluation, the Technology Team will adjust its Technology Plan accordingly. If an issue occurs mid-course, the Technology Team will develop a strategy to correct any unforeseen occurrences that might arise. The Technology Team will assure that the schools' objectives are achieved.

11. E-rate Program Planning Criteria (E-rate Plan Addendum)

To carry out this strategic technology plan, federal program such as The Universal Service Schools and Libraries Program will be important revenue sources used. The Universal Service Schools and Libraries Program is commonly known as the E-rate Program. E-rate helps schools and libraries obtain high-speed Internet access and telecommunications by providing funding. (USAC.org, 2016) To maximize funding through the E-rate program, an outside consultant will be used to ensure that WCPSS technology and financial staff take the necessary steps, complete the correct forms, and meet mandated deadlines to receive maximum funding. WCPSS will apply for fund each of three years. The items that will funded through the E-rate program will be procurement of high speed fiber optics, voice of IP phone service, and basic maintenance of networking appliances. According to the Universal Service Administrative Company (USAC) website, these service are categorized as priority one or two services and are

eligible for funding. (USAC.org, 2016). This plan forecast 25% (\$62,965.63) to 35% (\$88,151.88) or the E-rate services and equipment budget will be funded through the E-rate program.
